

BACKEND CODERS WANTED

Start: December 2018 or later

We are colleagues from the energy sector and data science area working together in a vibrant startup. EnergyCortex empowers industrial consumers, renewable energy producers, and energy supply companies by providing intelligent applications with machine learning and optimisation in a big data platform to reduce our customer's energy costs and increase their performance.

What we are looking for

if you know that python is not a snake, you understand the difference between push and pull requests, and you preferably have experience with cloud vendors, serverless or django : you are damn right in our team

What we offer

-  flexible **working student** positions (8-16h/week) and paid **internships** (3 to 6 months)
-  responsibility from minute one
-  supportive team in a vibrant startup

Just write us

German or English
