

DATA ENGINEERS WANTED

Start: December 2018 or later

We are colleagues from the energy sector and data science area working together in a vibrant startup. EnergyCortex empowers industrial consumers, renewable energy producers, and energy supply companies by providing intelligent applications with machine learning and optimisation in a big data platform to reduce our customer's energy costs and increase their performance.

What we are looking for

You are interested in machine learning and probabilistic programming technologies. You have programming skills in python or R and you have experience or you are eager to work with AWS EC2, data quality metrics, visualisation and git. Then come to us and work at the frontiers of data science!

What we offer

-  flexible **working student** positions (8-16h/week) and payed **internships** (3 to 6 months)
-  collect experience in advanced analytics
-  supportive team in a vibrant startup
